Implementation Discussion

Provost Moore reported that the Teaching Legacy Task Force’s white paper was well received at the highest levels and commended the group on their effort. He also requested that members consider continuing to work together at least through the early part of the implementation phase. Please let Candace Griffith know before July 1st whether you are available and interested in continuing to serve on this Task Force. If not, another representative will be found to replace you. After July 1st, the Provost’s Office will reconvene the group to begin planning for the implementation phase.

We are projecting a two-year implementation time line. The next steps will be to identify what needs to occur during this time and by when. Decisions should also be informed by budget realities. The outcome needed is a blueprint for implementation.

Meeting adjourned 4:15 p.m.
